Full-Stack AI Engineer | React/Next.js · FastAPI/Node.js · RAG & LLM Integration

## SUMMARY

Full-stack engineer who ships end-to-end AI features — React/Next.js UIs wired to FastAPI/Node.js backends and production RAG pipelines using GPT-4o-mini and ChromaDB. Built and deployed IntelliTrack, a live AI-powered GitHub issue platform, alongside a multi-tenant SaaS product and a React Native mobile app. B.E. Computer Engineering graduate, immediately available full-time.

## TECHNICAL SKILLS

- **Full-Stack:** React.js, Next.js, HTML5, CSS3, TypeScript, JavaScript, Node.js, Express.js, FastAPI, REST API Design, Python
- **AI & LLM:** RAG Architecture, Vector Search, SentenceTransformers, GPT-4o-mini, Structured Prompt Engineering, ChromaDB
- **Databases:** MongoDB (Motor async driver), MySQL, SQL Server
- **Auth & Security:** JWT, OAuth2 (GitHub, Google), Authentication & Authorization
- **Tools:** Docker, Git, GitHub, Postman, Expo
- **CS Fundamentals:** Data Structures & Algorithms, Operating Systems, Computer Networks, DBMS

## PROJECTS

### IntelliTrack — AI-Powered GitHub Issue Intelligence Platform | *FastAPI, Next.js, TypeScript, MongoDB, ChromaDB, GPT-4o-mini*

- Owned a full-stack AI feature end-to-end — React/Next.js UI, FastAPI backend, production RAG pipeline — deployed live on Vercel ([git-intellisolve.vercel.app](https://git-intellisolve.vercel.app))
- Designed and implemented an end-to-end Retrieval-Augmented Generation (RAG) pipeline: issue embedding via SentenceTransformers, vector storage and retrieval from ChromaDB, and LLM response generation via GPT-4o-mini for pattern-aware fix suggestions
- Integrated GPT-4o-mini with structured prompt engineering to deliver an AI feature suite: 0–100 priority scoring, auto-assignee suggestions from commit history, duplicate detection, and smart label recommendations
- Engineered a production-grade FastAPI backend with async MongoDB (Motor async driver), JWT and OAuth2 (GitHub, Google) authentication, and semantic vector search across indexed repository source code

### FitSaaS — Multi-Tenant Gym Automation Platform | *Next.js, Node.js, Express.js, MongoDB, JWT, TypeScript*

- Built a multi-tenant SaaS platform end-to-end, implementing JWT-based authentication and modular REST APIs with validation middleware and service-layer architecture
- Optimized MongoDB schema design to reduce redundant queries and improve retrieval performance; configured a CI-ready deployment structure

### AI Workout Tracker — Cross-Platform Mobile App | *React Native, TypeScript, Expo, Sanity.io*

- Built and shipped a cross-platform mobile app in React Native/TypeScript/Expo with a scalable Sanity.io CMS content architecture for structured workout data

## EXPERIENCE

### Data Analytics Intern — Kasnet Technologies

Jan 2025 – Feb 2025

- Delivered a fully validated 48,620-row dataset in Power BI, resolving all duplicate, missing-value, and date/category format errors before analysis
- Uncovered that weekends generated 60% of total revenue and that large-size items carried the highest margin despite the lowest order volume, directly informing promotional and inventory planning decisions
- Cut manual reporting effort by 2–3 hrs/week by building a self-serve interactive Power BI dashboard for the team

## EDUCATION

### Sinhgad Institute of Technology and Science, Pune

B.E. Computer Engineering (Honours in Cyber Security), CGPA: 9.11/10 — 2022–2026
